Introduction to Generative AI

Atanu Adhikari

AI/ML & Full-Stack Developer | Python, scikit-learn, PyTorch | LLMs, RAG, LangGraph, AI Agents | React, Node.js | CS & AI @ Newton School of Technology | Seeking AI/ML Internship

Sonipat, Haryana, India

Summary

I'm a B.Tech Computer Science & AI student at Newton School of Technology who builds end-to-end AI/ML projects, from data and models to deployed apps. I'm looking for a remote AI/ML or full-stack internship.What I've built:• Infant cry classifier: 218 librosa audio features + cost-sensitive Random Forest, benchmarked against a CNN (Python, scikit-learn, PyTorch)• Intelligent Exam Question Analyser: TF-IDF + Logistic Regression difficulty model and a LangGraph + ChromaDB RAG agent on Llama 3.3, live on Streamlit• GitHub Portfolio Reviewer: LangGraph AI agent on Llama 3.1 (Groq) with a FastAPI backend• Cognify: AI career-guidance platform built at Construct Hackathon, launched on Product Hunt• MediTrack: full-stack health records app (React, Node.js, Express, MongoDB, JWT)I'm also Acting Executive of DevClub at Newton School of Technology × Rishihood University.Skills: Python, NumPy, Pandas, scikit-learn, PyTorch, Machine Learning, Deep Learning, NLP, LLMs, RAG, LangGraph, ChromaDB, FastAPI, Streamlit, React, Node.js, Express, MongoDBPortfolio: atanu.onlineGitHub: github.com/techatanuEmail: atanuadhikari5@gmail.com

Experience

Self-Directed Projects

AI/ML & Full-Stack Developer (Project-Based)
November 2025 - Present (1 year)
Sonipat, Haryana, India

Independent AI/ML and full-stack projects: machine learning models, LLM apps and AI agents, plus MERN web apps deployed end to end.

• Built an infant cry classifier that sorts cry audio into 8 need states using 218 librosa audio features (MFCC, mel, chroma) and a cost-sensitive Random Forest, benchmarked against a PyTorch CNN with data augmentation.

• Co-built the Intelligent Exam Question Analyser: a TF-IDF + Logistic Regression model that predicts question difficulty, plus an agentic RAG pipeline (LangGraph, ChromaDB, Llama 3.3 via Groq) that writes improvement reports; deployed on Streamlit.
• Built a GitHub Portfolio Reviewer AI agent with LangGraph and Llama 3.1 (Groq), served through a FastAPI backend on Render with a Streamlit UI.
• Built MediTrack, a digital health record system with JWT authentication, role-based access and CRUD REST APIs.
• Co-built Cognify, an AI-powered career-guidance platform, at Construct Hackathon and launched it on Product Hunt.
• Built QuickCart, a React-based e-commerce cart with API integration and real-time price updates.

Tech: Python, scikit-learn, PyTorch, NLP, LLMs, RAG, LangGraph, ChromaDB, FastAPI, Streamlit, React, Node.js, Express, MongoDB

Education

Newton School of Technology

Bachelor of Technology - BTech, Computer Science and AI · (August 2024 - August 2028)
